

Interactive Map

Layer Control

OVERVIEW

This document will take you through the process of using Layer Control within the interactive map.

The Layer Control feature allows you to:

- Display/hide layers on the map
- Include/remove layers from the map legend
- Set the layer's label, label style and symbol style
- Reorder the draw order of the layers on the map

LAYER CONTROL

From the interactive map, click Layer Control.

Show/Legend/Select

Click the corresponding box/button next to the desired layer to perform any of the following:

LAYER CONTROL OPTIONS	
OPTION	ADDITIONAL INFORMATION
Show	Show/hides the layer on the map.
Legend	Displays/removes the layer from the map legend.
Select	Makes the layer selectable on the map. Note: The system automatically enables the Show/Hide checkbox of the selectable layer, making it visible on the map.

Reorder Layers

To change the draw order of the layers on the map, drag and drop a specific layer to the desired placement.

Layer Options

Click the Layer Options next to the desired layer.

Within Layer Options, the below modifications can be made:

LAYER OPTIONS		
LAYER OPTION		ADDITIONAL INFORMATION
Show Label	A screenshot of the 'ZIP Code Layer Options' dialog box. It contains a 'Set Layer Label:' dropdown menu with 'geographic_name' selected, a 'Show Label' checkbox, a 'Zoom To Extent' button, a 'Change layer Symbology' button, and a 'Style Editor' button. The 'Set Layer Label' section is highlighted with a green box.	From the Set Layer Label dropdown, specify the desired layer label and click Show Label. Note: To move labels on the map, right click the displayed label and select Move Label.

LAYER OPTIONS		
LAYER OPTION		ADDITIONAL INFORMATION
Label Editor		If Show Label is selected, click the Label Editor to make any of the below modifications to the displayed layer label: • Label font, size and color • Halo size and color • Label offset position Click Apply Style to update the Label display on the interactive map.
Zoom to Extent		Click Zoom to Layer Extent to zoom to the extent of a specific layer.
Style Editor		Click Style Editor to make any of the below modifications to the layer: • Layer fill color and transparency • Layer outline color, transparency, line width and pattern • Symbol shape and size (for point layers only) Click Apply to update the layer's style. Click Close Styler to close the Style Editor without making any changes to a layer's display.
